Personal Statement

With a diverse background in teaching English at Chinese universities, hands-on construction work, and helping people with substance abuse problems, I am now transitioning into a programming career driven by my love for learning, problem-solving, and creating visually appealing front-ends.

Professional Experience

Logistics Technician II

Apple

Apr 2024 – present | Mesa

- Decommissioning server assets in compliance with environmental regulations.
- Utilizing Linux servers to securely wipe hard drives and verify successful data erasure.

Front End Engineer

U-Well Health

Mar 2024 – present | Remote

- A React frontend for a telehealth startup aimed at linking patients and therapists through secure and efficient information collection. The site features multi-step forms, server actions, and server components to safely obtain, organize, and store patient and provider information.
- This is an ongoing paid freelance project where I collaborate with a team that includes a backend engineer, the CEO, and a marketing manager.
- In the second phase of this project, I set up AWS IAM groups, permissions, and users in preparation for deploying the frontend on AWS Amplify, and setting up a MySQL database.

Skilled Construction Worker

Coreslab Structures

May 2022 – Apr 2024 | Phoenix

Volunteer Experience

Sober Living House Manager

Safe and Sound

Apr 2023 – present | Phoenix

- Living with and managing a recovery house for 11 men, overseeing home maintenance, resident's recovery and well-being.
- Coordinating with parole/probation officers and case managers.
